

FOR IMMEDIATE RELEASE

JCL Energy Expands into Texas with New Alvin Facility

JCL Energy's new Gulf Coast location puts transformers, shop and field services, and rental equipment closer to customers across Texas and the entire Gulf Coast Region

SHARON, Pa. — October 28, 2026 — JCL Energy, a full-service transformer and electrical equipment solution provider, today announced the opening of a new facility in Alvin, Texas, marking the company's second location in the state. The Alvin location joins JCL's existing operations in Sharon, Pennsylvania, and Greenville, South Carolina and the support office located in Temple, Texas.

The Alvin location gives JCL Energy a more localized presence to support emergency response and electrical infrastructure needs in Greater Houston and the broader Gulf Coast Region, as well as in West Texas and the Permian Basin. Customers served from the site will include electric utilities and cooperatives, data center developers and operators, renewable energy and battery storage developers, oil and gas producers and midstream operators, and petrochemical, industrial, and commercial facilities. The site will offer rental and sales of transformers and power distribution equipment from a deep local inventory, supported with in-house testing and repair services.

"Houston is the Energy Capital of the World, and our customers here deserve a partner who is part of the community," said Chris Campbell, CEO of JCL Energy. "Alvin puts JCL's people, equipment and service capability within reach of the projects driving Texas's energy growth."

"Demand for transformers and field service across the Gulf Coast and West Texas is outpacing what the market can deliver," said Jared Penney, Vice President of Deployable Power Solutions at JCL Energy. "With rental equipment staged in Alvin and local crews ready to respond, our customers get faster turnaround and a team that knows the region."

Facility Details

Address	1500 Highway 6, Alvin, Texas 77511
Services	Transformer sales, rentals, and service and testing

About JCL Energy

JCL Energy is an electrical equipment and service provider specializing in transformers, switchgear, rentals, and both emergency and scheduled field services. Backed by decades of industry experience, JCL combines project-specific customization, national service teams and an expansive in-stock inventory to support the ever-increasing demands of the U.S. power grid.
